## **About PARF**

Offer high-quality training activities, Conferences, Seminars, symposia and workshops for researchers and students; Evaluate training offered elsewhere and where appropriate, partner with offering providers to make it available through the PARF; Become a model and an influential voice in the national/international dialogue regarding professional standards and expectations in the applicable humanities and social sciences. PARF initiates innovative research ideas by networking together the critical mass of resources. Our current focus is to integrate the research efforts of the scientific community to be a source of innovation on promising scientific, technological and socio-economic directions to shape the future. Research assumes a vital place in the activities of the PARF. That is why the most important element in the current, quality pedagogical work is following the latest research activities in the world and being creative and cooperative in the development of our own scientific research work. PARF conducts research and development activities sponsored by industry, NGOs, and funding agencies. These activities are in the field of humanities and social sciences. PARF has no permanent staff but our researchers and associates have been educated at various recognized Indian and institutes. We have never believed that being the best in the local arena is good enough. If this were the case, we would have had to start regressing and would have lost contact with actual events. We have created a criterion for ourselves, our researchers which suits today's global conditions. Despite the problems, we have managed , to obtain experienced researchers, and maintain good relations with our partner. Our information infrastructure is efficient one; therefore, we will be even more demanding in maintaining this strength.

## **About Sangam City**

In the Hindu tradition, the three rivers Ganga, Saraswati and Yamuna symbolise Knowledge, Dispassion and Devotion, respectively. Sangam at Prayag is their meeting point. Seekers have travelled to this place for millennia to be blessed with knowledge, dispassion and devotion in the presence of wise sages. Sri Sri Ravi Shankar refers to the Kumbh mela as, 'the largest and oldest spirituality expo in the world. In fact it is the oldest expo in the world.' The Kumbh mela takes place every three years at Prayag, Haridwar, Ujjain and Nasik. At Prayag, Magh mela takes place every year in the month of January. Seekers come and camp here. There is white sand for miles

around the river beds. The Kumbh Mela in 1894 at Prayag is where Paramhansa Yogananda ji's guru Yukteshwar Giri ji had met the Adi Guru, Maha Avtar Babji. This is where Bharadwaj Rishi heard the Ramayan from Yagyavalka Rishi after a Kumbh mela. Ganga and Yamuna water are distinct in colour and character, seen clearly at their meeting point at Sangam. The dark green Yamuna merges with the muddy Ganga. Ganga Gulls flock here in thousands. People come to bathe at the rivers' confluence in lakhs on festivals like Makar sankranti, Basant Panchmi, Maha Shivratri, Mauni Amavasya, eclipses, Purnima, Amavasya, Kartik Purnima and Bhai Dooj. On Bhai Dooj or Yam Dwitiya , brother and sister take a dip together in the River Yamuna.
